Detailed Description of Program: When we think of serial killers we think of anger and hatred, feelings that can cloud judgement and do not represent our Saint Leo core values. Becoming angry about a situation will usually result in negative consequences and is something we as RAs try to prevent from happening. Residents will get together to find out what makes them mad. After discussing over a bowl of cereal we will talk about solutions that can be dealt with while being mad and perhaps find ways to avoid what makes them upset and change their perspective on the issues. Instead of being angry serial killers we will be calm, level-headed cereal killers.

What will your residents gain from attending this program? 1. Residents will discuss issues that make them upset 2. Residents will learn or suggest ideas on how to deal with those issues 3. Residents will enjoy a bowl of cereal in each others company	Describe which goals were achieved (and how) and which goals were not achieved (and why). 1. Residents discussed what makes them upset and why 2. Residents offered solutions for what they could do in order to change their attitudes about situations and how to confront them when the issues arised again 3. After spilling milk everywhere, we enjoyed bowls of cereal. Residents also learned each others names and became more familiar with each other

What did students attending say about the program? The students found the information on the serial killers I provided very interesting. They enjoyed the cereal as well as each other's company. We had fun and discussed some possible future programs as well.

What would/could you do differently to improve the program? Encourage residents who do attend to let their roomates know about the social going on if they are not in their room.
